- ✓ Electronic/Algo/Portfolio trading & TCA
- ✓ Financial products: Global Equities, ETFs, Options
- ✓ Excel Financial modeling

Professional Experience

CIRCULAR.CO, Raleigh, NC (Remote)

Led product, design and data mgmt functions for early stage VC-backed B2B sustainability startup focused on recycled plastics data aggregation and analytics. Owned and delivered on product GTM strategy + roadmap via weekly/monthly/quarterly OKRs.

VP/Head of Product, 04/2022 to 08/2024

- Launched first of a kind (FOAK) AI-based data analytics decision support tool for sourcing recycled plastic resins, using LLMs to train our ingested data model
- Routinely contribute to newsletter and website thought leadership content pertaining to the Circular offerings and the recycled plastics regulatory landscape
- Perform sales support functions such as product demos, platform support and product feedback aggregation for customers and prospects
- Own data acquisition and partner strategy roadmap for the company, as well as overall product design direction and QA process for data cleansing and new features
- Create, execute and track progress against product/design/engineering OKRs for continuously delivering software value to Circular beta users
- Measured GHG avoided emissions for recycled vs virgin plastic using in-house tool

VIKING CLOUD (formerly NuArx), Raleigh, NC

In four years, established a formal product organization in partnership with the COO. Led all product operations and P&L mgmt. for Business Solutions business unit, with significant influence on commercial, marketing, product engineering, sales, vendor, legal, and support functions. In 2021, Sysnet Global Solutions completed its multifirm merger with NuArx, Viking Cloud, and ControlScan. The merged entity relaunched as VikingCloud.

VP/Head of Product, Business Solutions, 03/2021 to 04/2022

Director, Product Management, 04/2017 to 03/2021

- Spearheaded product roadmap and GTM launches for NuArx's managed security (MSS) and business continuity services portfolio, including setting/tracking OKRs, oversight of product-market fit, competitive positioning, pricing, software and IT development, and go-to-market (GTM) launch
- Represent the company as a subject-matter expert in MSS product demonstrations and consultations with major customers
- Coordinated product solutions pivot with marketing around our digital transformation enablement value prop for IT personas
- Led product team of four in executing dozens of revenue-growing and cost-saving initiatives, including:
 - Implemented Agile best practices and product telemetry across product org
 - Ingesting/mapping unstructured txt data to JSON to create threat alerts
 - Automated key parts of user onboarding and data breach reporting
 - Migrated customer data from NuArx to Viking Cloud portal
 - Coordinated cost-saving SIEM migration initiative (3rd party to in-house)
 - Oversaw customer portal data cleanse and consolidation phases
 - Implemented Vulnerability Scanning MVP into Viking Cloud's Asgard portal

Case Study

Endpoint Protection Platform (EPP), Viking Cloud

Led GTM development of in-house endpoint agent offering foundational to company success with 83% cost savings vs legacy tech.

Captured 66% savings by negotiating pricing for the software's antivirus (AV) and advanced threat detection/anti-ransomware feature in a white-labeling deal. Navigated several GTM roadblocks, such as phasing the release by customer segment after failing third-party certification testing for AV.

Drove long-term plans to deploy the service to all 4M partner and business solutions customers, equating to \$10M to \$20M in projected annual revenue.

DUKE UNIVERSITY, Durham, NC

Bachelor of Science (BS) in Economics

Key Achievements

- **Network Health:** Quick service restaurant (QSR) customers had to rapidly change business models to take-out during the global COVID-19 pandemic. Initiated a new business continuity solution to facilitate digital transformation initiatives. Developed a network health analytics offering, monetized as an add-on user interface and API-only data subscription service. The offering shows and alerts to internet connectivity issues that could impact online ordering in real time. Gained 3,000 QSR customers in eight months for \$30K monthly recurring revenue.
- **Branch in a Box:** Structured and launched a managed cybersecurity and compliance services product package for the banking vertical.
- **Managed Broadband:** Led GTM launch for new managed broadband offering to complement existing MSP portfolio, which produced \$72K MRR in 2021 to date. Negotiated multiple contractual agreements with ISPs (Spectrum, Comcast, AT&T, Cox, etc.) and built a new business process for provisioning and ordering internet circuits. Reviewed and negotiated dozens of legal agreements, including Ts&Cs updates and MSAs with third-party partners.
- **My NuArx Portal:** Built out the managed compliance and MSS customer SaaS portal and grew from 5,600 to 27,000 customers, a 482% increase/48% CAGR in usage in four years. Managed the MSP product roadmap, including data analytics, alerts, and visualizations to enhance support for NuArx managed services for network health, business continuity, connectivity, security, and PCI compliance.

IPREO (now IHS Markit), Raleigh, NC

Director, Product Management, Fixed Income, 2015 to 2016

Managed the \$20M fixed-income B2B software line of business (4 direct reports), with products used by approximately 70 clients in the investment banking industry. IHS Markit acquired Ipreo, a software solutions and data provider in global capital markets, in 2018.

- Improved persona workflows for bank syndicate book-building applications and an order management system for multibank new bond issuance deals
- Led Waterfall to Agile transformation across four globally distributed Scrum teams
- Designed new workflow for direct investor electronic order routing initiative

BLOOMBERG, LP, New York, NY

Financial Software Product Manager, Execution Management System (EMSX), 2011 to 2015

Owned the buy-side product roadmap for the EMSX platform. EMSX is a global, multi-asset class trading, execution management and analytics platform that integrates Bloomberg exchange and broker data with equity, futures, and options orders.

- Enabled 14% growth in EMSX usage for customer base of ~16K users
- Offered subject-matter expertise on market microstructure, portfolio and electronic trading workflows/analytics, OMS/EMS integration, & transaction cost analysis (TCA)

KNIGHT CAPITAL AMERICAS, LP, Jersey City, NJ

Vice President, Global Portfolio Trading & Sales, 2010 to 2011

Initiated start-up of the global portfolio trading business to augment existing domestic U.S. equities and ETF business. Onboarded clients, built/tested new features, ETF create/redeem

SOCIÉTÉ GENERALE, New York, NY

Associate, Global Program Trading & Electronic Execution Services, 2006 to 2010

Advised institutional and private banking clients on portfolio construction and global trading. Grew the desk's index rebalance and risk trading business from \$2M to \$30M. Built and launched a \$2M DMA/algo electronic execution business in U.S. and Latin America.
